Distance Tag: new personal monitoring app by Gurtam

Aleksandra Dikan

Business Analyst of the Mobile Development Team

GURTAM

Today I share with you

Why we need Distance Tag and how it can help

How to set up and configure Distance Tag

How Distance Tag can be used to monitor people during
COVID-19

Other use cases (monitoring of workers, people under home arrest,
parental and elderly people control, etc.)

Why this new solution and not the current ones

✔ Distance Tag

◆ easy creation of a unit without Wialon

◆ easy binding of a BLE beacon

◆ one fixed regime of work

❌ WiaTag

◆ difficult to configure

◆ excessive functionality

◆ easy to 'break' the regime of sending of messages

We developed 2 mobile apps

◆ **Distance Tag**

Turns your phone in a GPS tracker with possibility to bind a BLE beacon

◆ **Distance Tag Admin**

Simplifies the process of units' creation and configuration, and binding of BLE beacons

Distance Tag

Better functionality and UX with a special emphasis on in-door monitoring.

With its help you will be able to:

◆ Know where a monitored person is

◆ Register diverse events

◆ Bind BLE beacon

◆ Stay in touch with a monitored person

◆ Bind BLE beacon

◆ Create diverse notifications, reports, and events
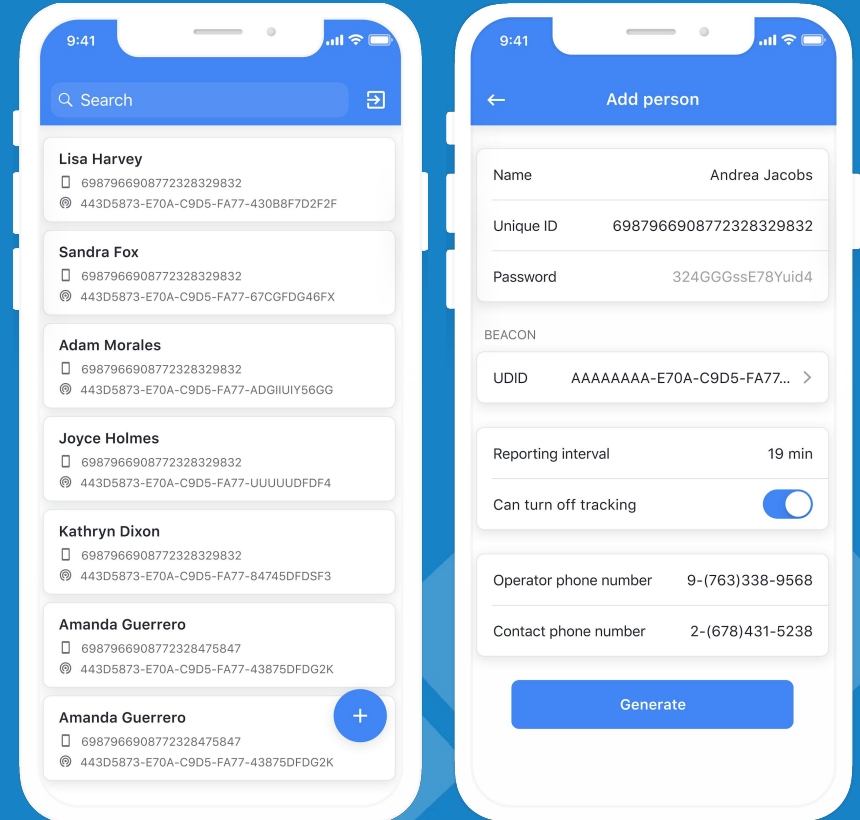

◆ Execute different commands via Wialon

Distance Tag Admin

Quick and simple way to set and configure Distance Tag units

With its help you will be able to:

◆ Create new units quickly and efficiently

◆ In two clicks bind BLE beacons

◆ Configure units' reporting intervals

◆ Allow/forbid to switch off tracking

◆ Generate QR-code for a quick log-in in Distance Tag

Use cases

◆ **Medicine and COVID-19:** monitoring of people on quarantine, people and doctors in medical institutions and etc.

◆ **Security:** security services, people on home arrest, monitoring of people in the territories with military operations

◆ **Monitoring of employees**

◆ **Monitoring of children and elderly people**

Examples of BLE devices

Thank you for your attention!
