Webinar agenda:

- ◆ Cargo transportation GPS monitoring: tasks and how to solve them?
- ◆ Why choosing Galileosky device on Wialon for cargo transportation?
- ◆ User case of using Galileosky on Wialon for cargo transportation

About the webinar

- ◆ Webinar length – about 60 minutes
- ◆ Recording of the webinar will be sent to the email that you write when registering for the event
- ◆ Webinar related questions can be asked on the **Questions tab**

Cargo transportation GPS monitoring: tasks and how to solve them?

Keep an eye on the fleet

Get data about each truck performance

Prevent
premature tire
wear

Monitor refills and
exclude fuel drains

Record
travelling time
on high engine
speed

Notify about the
need to undergo
maintenance

Prevent weight
overload

Monitor and optimize routes

How long does the road take and how to shorten it?

- ✓ Get location data online
- ✓ Monitor toll road mileage and route tracking
- ✓ Control delivery by creating polygonal geofences
- ✓ Reduce the number of empty runs and unauthorized routes

Ensure the cargo safety all way long

Perishable, fragile, expensive: comprehensive protection

Provide access
to cargo for
approved stuff

Make photos
when cargo
weight changing

Maintain ref
temperature
level
automatically

Control driving
style when
transporting
fragile cargo

Notify the if
someone breaks
into the truck

Stay connected with the driver all way long

- ✓ Carry out driver ID with iButton and RFID cards
- ✓ Start the engine after verification
- ✓ Monitor work and rest time via the tachograph or using the device itself
- ✓ Keep tracking the speed: adjust limits in different weather conditions
- ✓ Let the driver warm the car up by command from smartphone
- ✓ Set up voice communication between driver and dispatcher

Galileosky devices features for cargo transportation

Use Galileosky tracking units to:

**Receive data
from truck
CAN-bus
directly**

**Get accurate
data all the way,
despite GSM
absence**

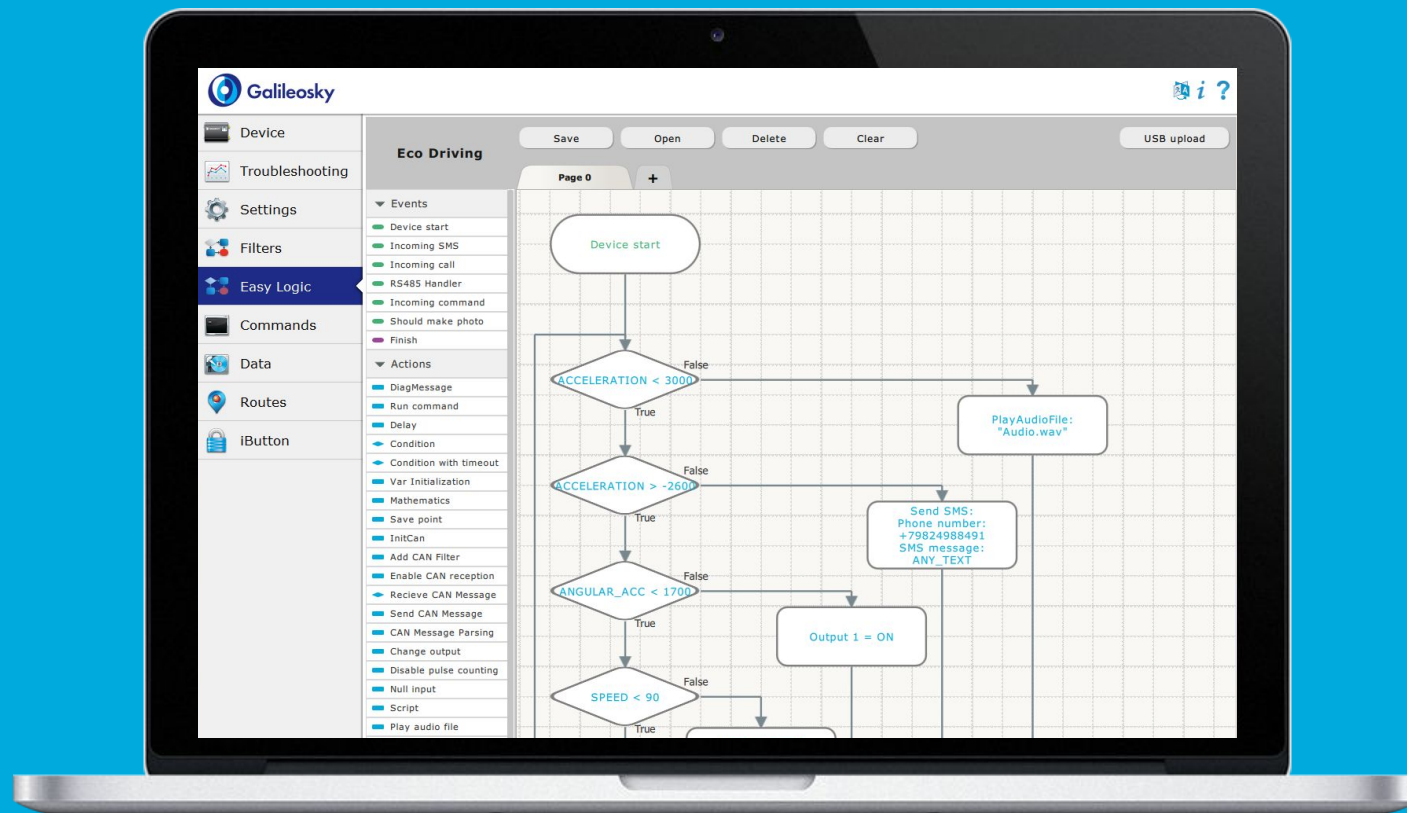

**Send
notifications of
any violations**

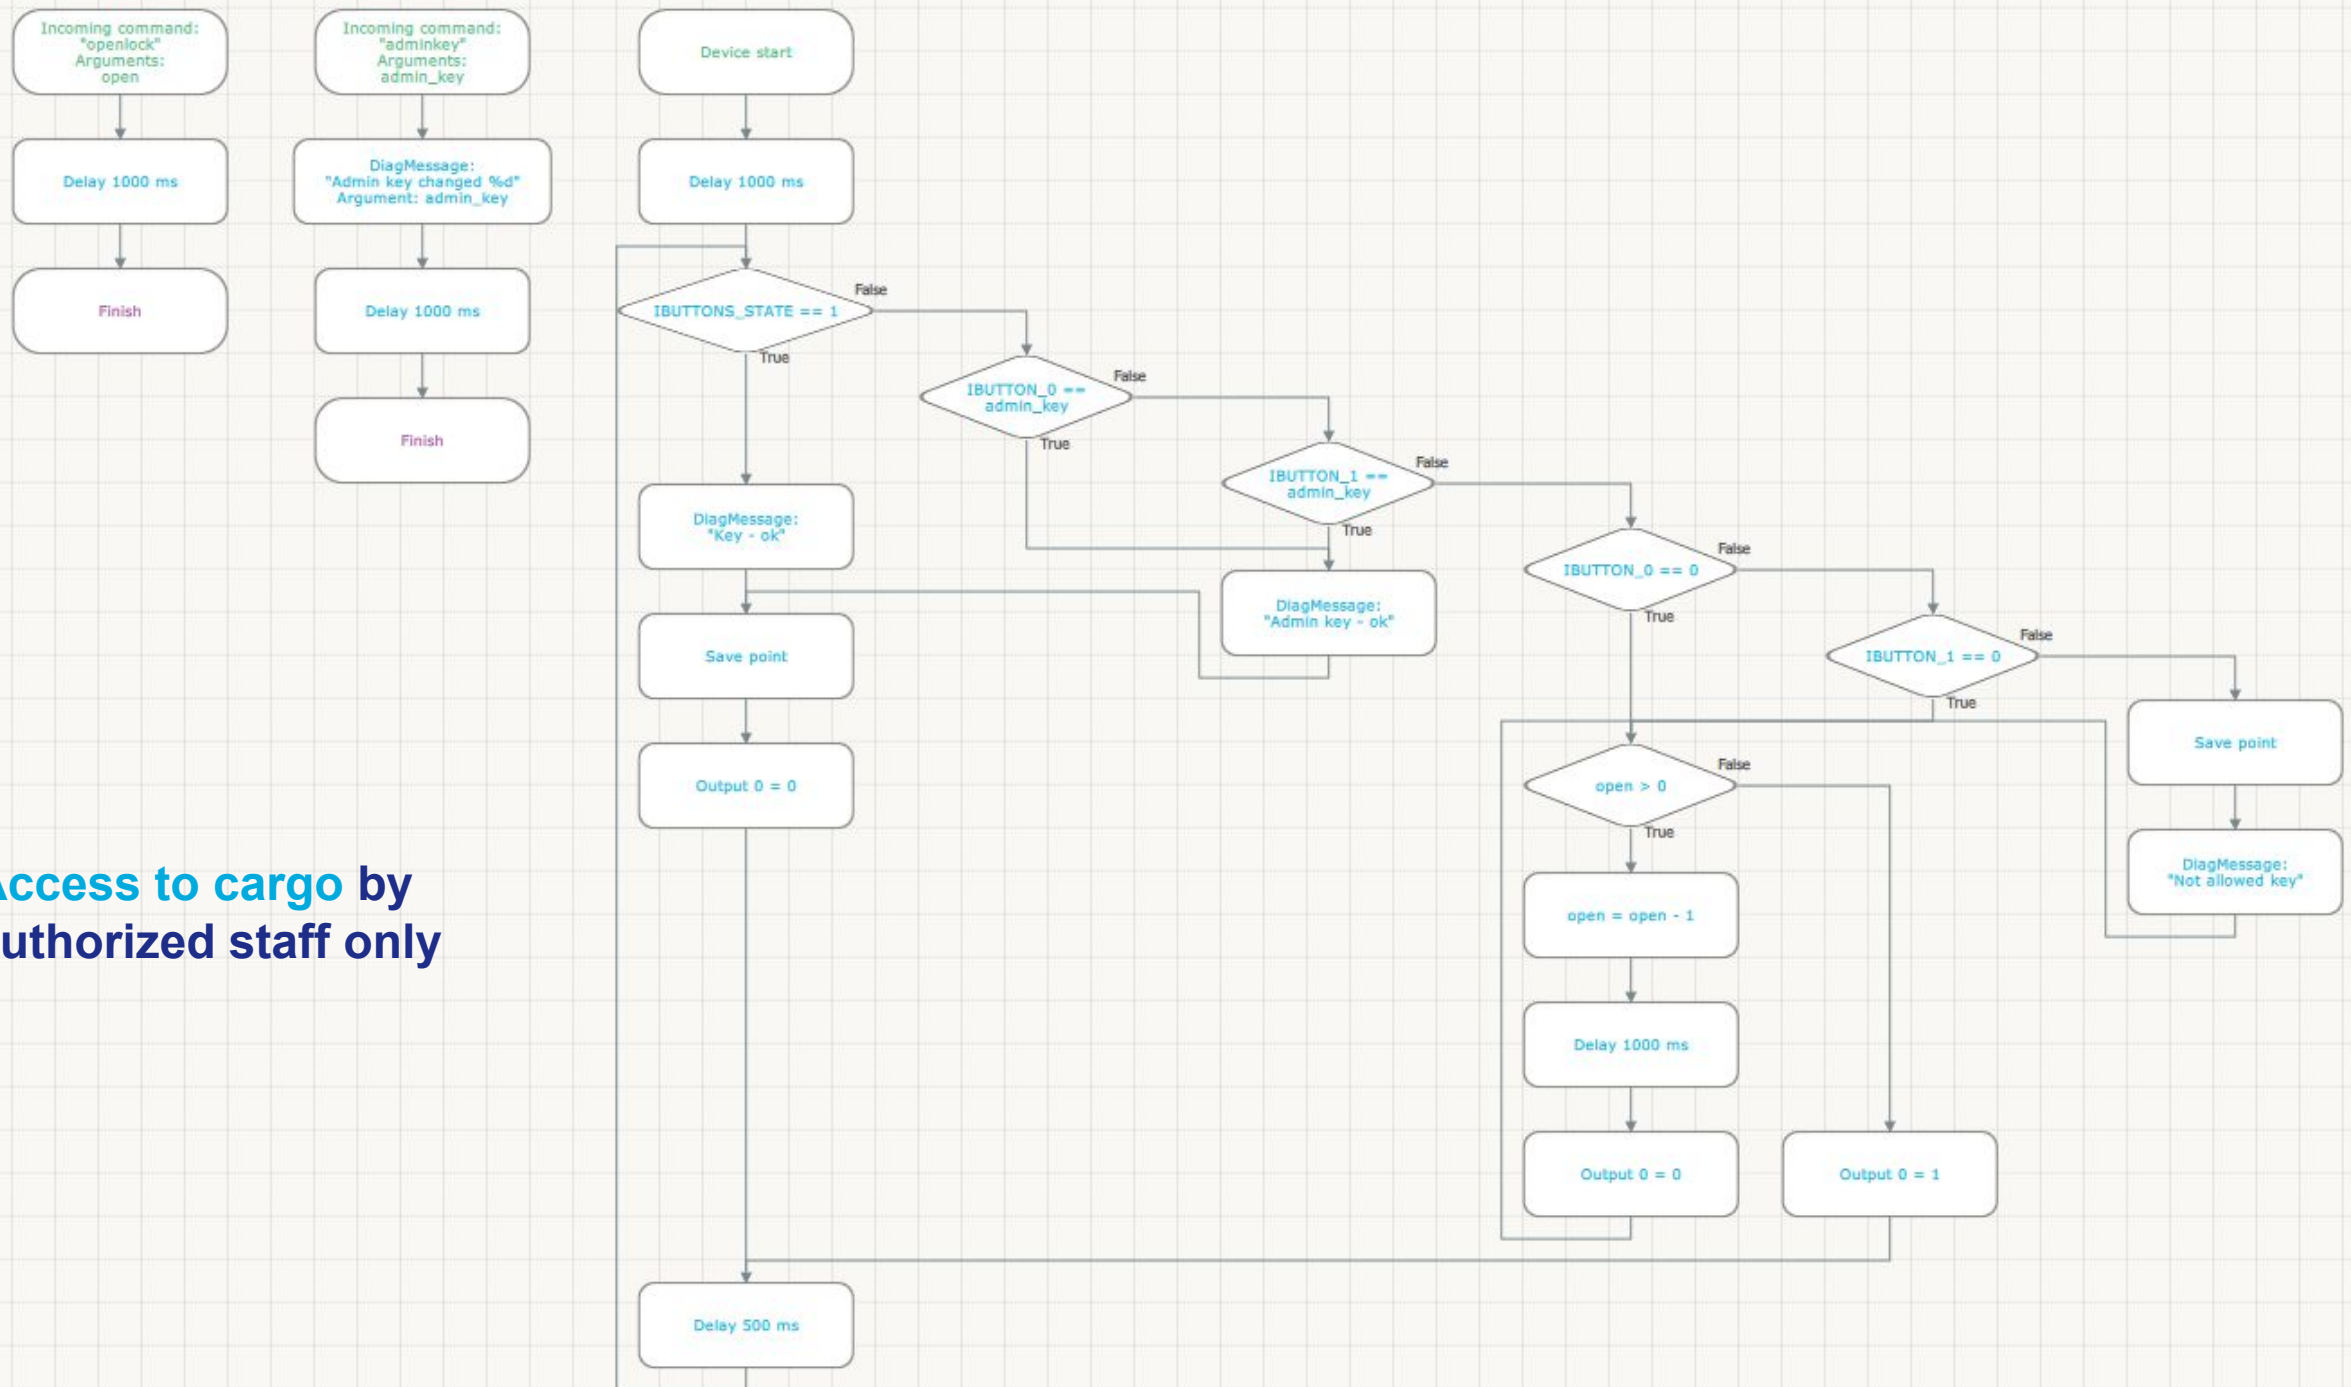

**Connect any
peripherals to
control different
parameters**

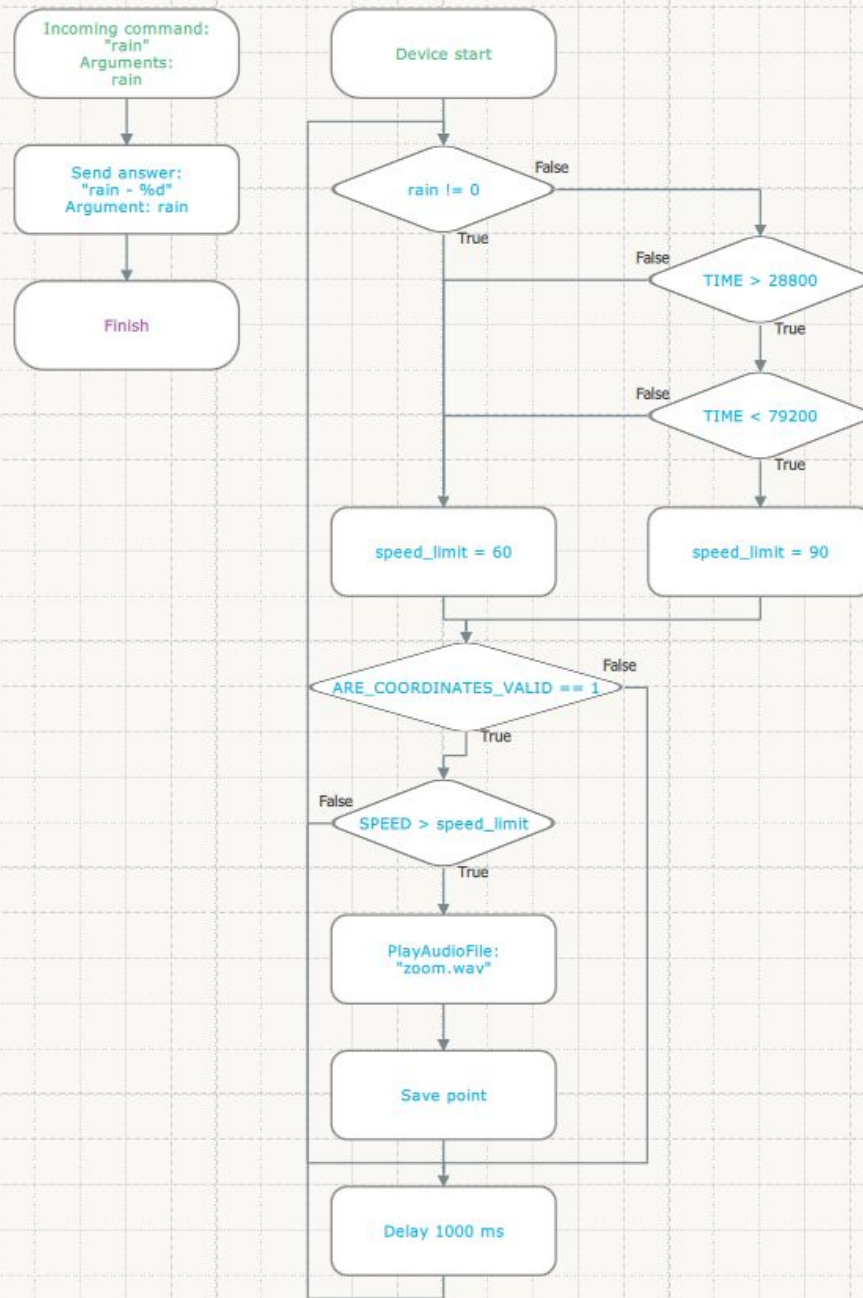

**Create any Easy
Logic scenarios
to control the
driver, car and
cargo**

create drag-and-drop
algorithm, and the
desired functionality
for the tracker is ready

Access to cargo by
authorized staff only

Speed limits control
depending on time and
weather conditions

We will send algorithms to all participants

Easy Logic

1

Access to cargo by
authorized staff only

2

Speed limits control
depending on time and
weather conditions

Bonus

What device to opt for?

Galileosky 7x

- ✓ 2 CAN
- ✓ RS 485, RS 232, 1-Wire
- ✓ Bluetooth 5.0
- ✓ 6 inputs / 4 outputs
- ✓ 2 nano-SIM, USB 2.0
- ✓ CAN Scanner, Easy Logic
- ✓ Exigner Driver App
- ✓ Voice connection
- ✓ Auto informer
- ✓ SD card support up to 512 GB

Galileosky 7x Plus

- ✓ 8 inputs / 4 outputs
- ✓ Bluetooth 5.0
- ✓ RS 485, RS 232, 1-Wire
- ✓ 2 nano-SIM, USB 2.0
- ✓ CAN Scanner, Easy Logic
- ✓ Exigner Driver App
- ✓ Eco Driving
- ✓ Voice connection
- ✓ Auto informer
- ✓ SD card support up to 512 GB
