Webinar agenda

◆ Companies introduction

◆ Cooperation history

◆ What is Queclink GV600?

◆ Scenarios

◆ Queclink GV600 on Wialon

◆ Q&A session

Estimated length – 60 min

GURTAM

Queclink WIRELESS SOLUTIONS

Queclink

- Listed on the Shenzhen Exchange stock market since 2017
- Global presence with branch offices
- Sales in 140 countries
- Wide product range for various applications
- 10 million products shipped worldwide

Gurtam

◆ 2,5 million devices connected

◆ 17 years on the telematics and IoT market

◆ 36% of the CIS commercial carrier market

◆ A team of 250 talented specialists

◆ Offices in Minsk, Moscow, Boston, Dubai, and Buenos Aires

WIRELESS SOLUTIONS

Rechargeable ruggedized trailer tracker

Sub models

GV600MG (LTE version)
Global LTE Cat M1/NB1 with 2G fallback using unique antenna solution

GV648W (3G version)
WCDMA/GSM globally applicable with 2G fallback

Unique design

Ruggedized and waterproof case is IP67 compliant and designed for use in harsh environments

Internal large battery pack with 120-day standby time makes it ideal for tracking trailers even when disconnected

Supports dual power sources when mounted on refrigerated trailers

Rechargeable ruggedized trailer tracker

GV648W (3G), with 2G fallback

GV600MG (LTE), with 2G fallback

Other features

- BLE 4.2
- IP67-waterproof
- Multiple I/O interfaces
- 1-wire interface
- RS232 serial port
- OTA control

- Scheduled timing report
- Power on report
- Low-power alarm
- Fuel level monitoring
- Temperature sensor support

WIRELESS SOLUTIONS

GV600 series – Ideal for both asset and vehicle applications

Real use case scenario

In North America, they use Queclink GV600 series mainly for trailer and flatbed tracking. But sometimes trailers and flatbeds can be sitting in a yard for many weeks...

NOT connected to vehicle

The device will be reporting once or twice a day when not moving and without power like a Queclink GL device.
Once GV600 detects vehicles are not moving, and it doesn't get power, it will switch to a **Cellular Deep Saving mode** and wake up every 12 hours to send its location but can also wake up based on motion

Connected to vehicle

The device will detect ignition by motion or power line and also read the information from the temperature sensors.

GURTAM
